

The FireBreather

Exodus Pictures and Classic Design Concepts would like to thank you for your interest in our unprecedented hero car, The FireBreather. To show our appreciation for your support, we would like to let you in on the latest details of how you can get behind the wheel of your very own FireBreather.

We introduced The FireBreather, serial number 000, to the public at the Detroit Autorama back in February to an enthusiastic throng of movie fans, car buffs, and media contacts alike. The film has officially wrapped and that exact vehicle was the hero car in the movie "Jinn", Exodus Pictures' upcoming supernatural thriller due out at the end of the year. The film, which was produced entirely in the state of Michigan, will present a phenomenon known to two billion people globally, but has yet to be introduced to the western world.

The FireBreather, like the movie, is a groundbreaking concept that connects the viewer to the cinematic experience. It is the first movie car to be conceived and designed with the intent to bring the experience home to the car enthusiast.

The FireBreather will be offered in two exclusive packages. Only 50 vehicles will be built for The Signature Series package. The limited run of vehicles will each be branded with its own serial number and personalized tattoo. The 50 Signature Series vehicles feature performance upgrades including: Pirelli Tires, JBA Exhaust, Eibach Suspension and Edelbrock Supercharger. Aside from its stunning features, this package will grant the owner exclusive access to VIP movie events and autographed memorabilia.

For the car enthusiast who already owns a Camaro, our Standard Series package will allow you to transform your vehicle into the spectacular FireBreather with an appearance package and performance upgrades.

The FireBreather is more than just a flashy vehicle. The FireBreather is a movie hero car that encompasses the best of Michigan innovation, manufacturing and American muscle. Co-founder of Exodus Pictures, writer and director, Ajmal Zaheer Ahmad created The FireBreather as part of a greater commitment to his home state. It is a true American muscle car born of talent and hard work.

The FireBreather will be touring this summer across the United States. We look forward to sharing with you the events that it will be featured at. We'll have more to come on the FireBreather and its impressive summer adventure.

Thank you for your continued support.
