

This guide is to help you correctly determine if your vehicle should be in a Stock or Modified class.

Stock = 3 or less modifications

Modified = 4 or more modifications

Asterisk (*) = any modification with an asterisk automatically puts your vehicle in a Modified class even if it is the only modification

Non-Original = an alteration in appearance from what was factory equipped on the vehicle being registered at the time of your vehicle's production

Due to the number of modifications available in the market this list does not list every one available for every vehicle. We ask you to be completely honest when looking at this list. Carlisle Events reserves the right to amend this list at any time and also to reclassify any vehicle at any time without explanation.
